

POWER SCHOOL DATA BREACH

Dear Lewiston Parents, Patrons, Staff, and Students,

On December 28, 2024, PowerSchool became aware of a cybersecurity incident involving unauthorized exportation of personal information from certain PowerSchool Student Information System (SIS) environments through one of our community-focused customer support portal, PowerSource. This breach does include information on some past and present Lewiston students, staff, and parent information. For involved students and educators, the types of information exfiltrated in the incident may have included one or more of the following: the individual's name, contact information, date of birth, limited medical alert information, Social Security Number (SSN), and other related information.

Am I required to reach out to my school or take any steps as a parent or guardian at this time?

No. If you are a parent or guardian of a student under the age of 18 and your student's information was exfiltrated from their district's PowerSchool SIS, you will receive a notification email from PowerSchool over the next few weeks.

Former students and/or staff may contact the school to see if their name is listed in the breach.
